

► An alternative SIEM to deliver on your cyber strategy

Migrating from your current SIEM to the Huntsman platform has never been easier. Our technical team will advise on the best way to achieve a smooth transition.

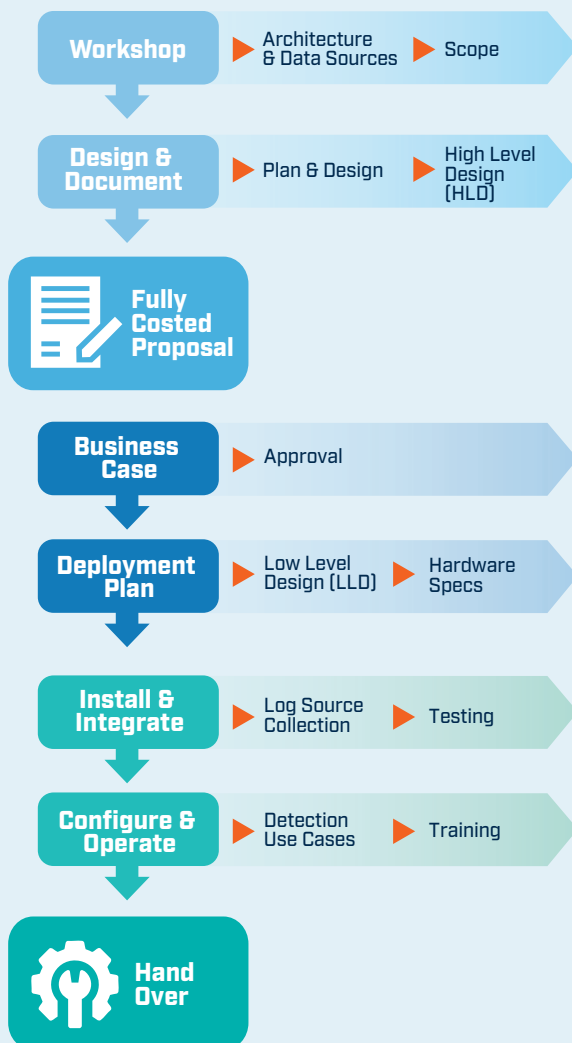

Our offer? A free software licence during transition to a new and more effective Enterprise SIEM.

As one of the few preferred platforms for secure and closed networks, the Huntsman SIEM is a robust, feature rich solution, with a wide range of capabilities to meet sophisticated security needs. It is highly flexible, capable of collecting data from any device, application or source, even the most complex or bespoke.

With scalable and adaptable architecture, it meets the changing needs of any size organisation and delivers a lower Total Cost of Ownership with Premium support as standard.

► Huntsman's technical and migration team are on hand for a seamless transition

Huntsman's SIEM migration process

- **Free initial workshops to determine scope of migration:**
 - Supported and bespoke sources
 - Platform sizing and data archiving
- **High Level Design details solution architecture, design and operation specific to the customer's requirements**
- **Huntsman's proposal provides support for the business case for migration, including licence costs, migration tasks, skills transfer and training**
- **Customer internal stakeholder review and approval**
- **Low Level Design details hardware specs, network requirements, and environment specific configuration.**
- **Deployment of Huntsman's core engine in a matter of hours, followed by rapid on-boarding of sources supported out-of-the-box (800+ in-built)**
- **Configure custom Use Cases and bespoke data sources. Hands on, instructor led, training:**
 - 2 day User course
 - 3 day Administrator course
- **Finalise project and handover to support team**

► The Huntsman Guarantee

- ✓ **Transparent pricing**
 - Simple transparent pricing based on EPS
 - Agents, dashboards, reporting etc. are all included
 - No additional charges for storage or retrieval
- ✓ **Free migration consultation**
- ✓ **Free migration workshops**
- ✓ **Free software licence during transition**

► Why Huntsman?

Proven Track Record

With comprehensive use cases covering all security monitoring requirements, Huntsman has 15+ years experience protecting the most demanding environments.

Exceptional customer retention rates demonstrate scalability and adaptability to meet constantly changing security and compliance requirements.

Collects from the most complex environments

A proven track record of being able to collect and parse data from any readable source.

Immediate benefits

Rapid deployment and seamless transition smoothes the migration path, allowing teams to quickly leverage Huntsman's high speed, in-stream decision making for real-time alerting. Delivering improved workflows, efficiencies and incident response times.

Low Total Cost of Ownership

Minimal platform management overheads (hours instead of days).

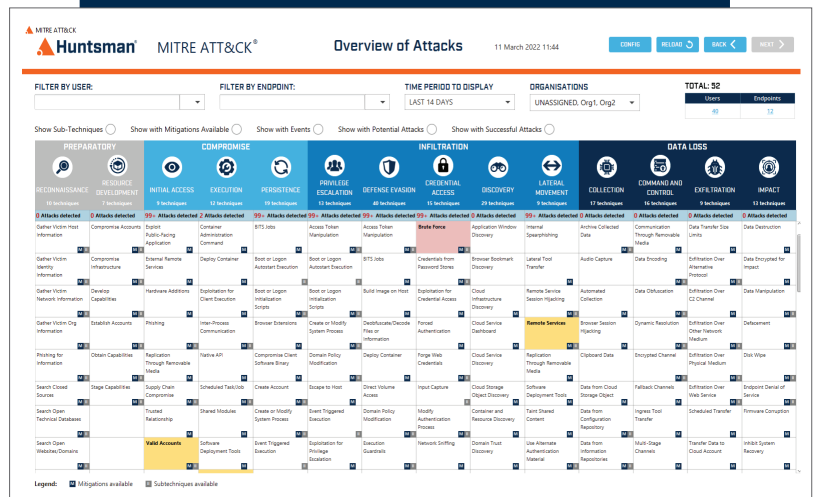

Ongoing development

Huntsman continues to be a leader in security monitoring, ensuring its flexibility fits with the growth and resilience of the organisation. This improves workflows, efficiency and root cause analysis.

► Enhance your security monitoring

Huntsman is at the forefront of security monitoring, threat detection and incident response which includes:

- ✓ **MITRE ATT&CK® heatmap for easy visualisation of attacks**
- ✓ **Threat Exposure Management for improved SOC operations and Cyber Resilience**
- ✓ **In-built *Incident Manager* for efficient threat handling**
- ✓ **API for easy integration with external SOC tools**

**Tired of a poorly supported,
difficult to use, or expensive SIEM?
